PROFESSIONAL SUMMARY

B.Com graduate with practical experience in SQL, Excel, Power BI through data analysis portfolio projects. Seeking an entry-level Data Analyst role to analyze data, build interactive dashboards and generate insights to support data-driven decision making.

TECHNICAL SKILLS

- Microsoft Excel - Pivot Tables, Charts, Data Cleaning, Data Analysis
- SQL– MySQL, JOINs, GROUP BY, Aggregate Functions, Subqueries, Window functions, CTEs
- Microsoft Power BI – Data visualization, Dashboard creation, KPI, Slicers, Data Modeling, DAX basics
- Basic Statistics- Mean, Median, Trend Analysis

PROJECTS

Retail Sales Dashboard – Excel | Power BI | GitHub : view project

- Developed an interactive dashboard to analyze monthly sales trends, top-selling products, and category performance for better business insights using 2500+ sales records.
- Created KPIs cards for Total Revenue, Total Profit, Profit %, Average Discount, Total Quantity.
- Built interactive visualizations using bar charts, line charts, and Slicers for dynamic filtering.
- Generated actionable insights into sales trends and customer behavior to support business decision-making.

E-commerce Sales Analysis Dashboard- Excel | Power BI | GitHub : View project

- Built an interactive dashboard to analyze 3000+ sales records, identifying sales, profit and product performance trends for a simulated e-commerce business.
- Created KPI cards for Total Sales, Total Profit, Total Orders, Average Profit% with regional and category drill-down.
- Identified the top 5 products contributing to 40% of total revenue, highlighting opportunities for inventory planning and marketing.
- Analyzed monthly sales trends to support seasonal stocking and promotional decisions.

Customer Purchase Analysis – SQL | GitHub : view project

- Analyzed customer purchasing behavior, spending patterns, and product performance using SQL.
- Used aggregate functions and GROUP BY to calculate total revenue, order counts, and average order value.
- Applied JOINs to combine customers and orders data and identify customers who had not placed orders.
- Analyzed monthly revenue trends and identified top-performing products and categories.

EDUCATIONAL QUALIFICATION

- Bachelor of Commerce (B.Com) | Bidhan Chandra College , Calcutta University
- CGPA: 7.116
